Academic Network

A project of the EPBS

EPBS Academic Network

The EPBS Academic Network is a network of universities, colleges and schools that teach Biomedical Science across Europe.

The EPBS Academic Network was founded in 2011 by the EPBS, European Association for Professions in Biomedical Science, and it is right now about to be built up. In the meantime all Biomedical Science educational institutions in Europe were contacted to become members of the EPBS Academic Network.

A member of the EPBS Academic Network will have access to relevant information on Biomedical Science, the opportunity to participate in European projects, develop new bachelor, master and PhD programs in Biomedical Science.

The educational institutions can enhance their ERASMUS exchange programs by finding new partnerships, in the near future the web site of EPBS will have a dedicated area for this project where their contacts will appear and also a reserved area for working projects linked to the Academic Network.

Membership is free of any charges and the educational institution is as member of the Academic Network further an affiliate member of EPBS with all the benefits associated.

- ✓ International visibility
- ✓ Inspiration for professional development
- ✓ Discussions of mutual concern
- ✓ Possibilities of international cooperation/collaboration - research and other
- ✓ New perspectives and views of different cultures
- ✓ Contributions to Quality Assurance and benchmarking for Biomedical Scientists
- ✓ Researching the extent of Evidence Based Practice
- ✓ Exploring and sharing learning & teaching methods
- ✓ Strong student involvement
